Architectural and Commercial Molding

## PROFILE CATALOG

## **Commercial and Residential Molding Available:**

### **Molding Specifications**

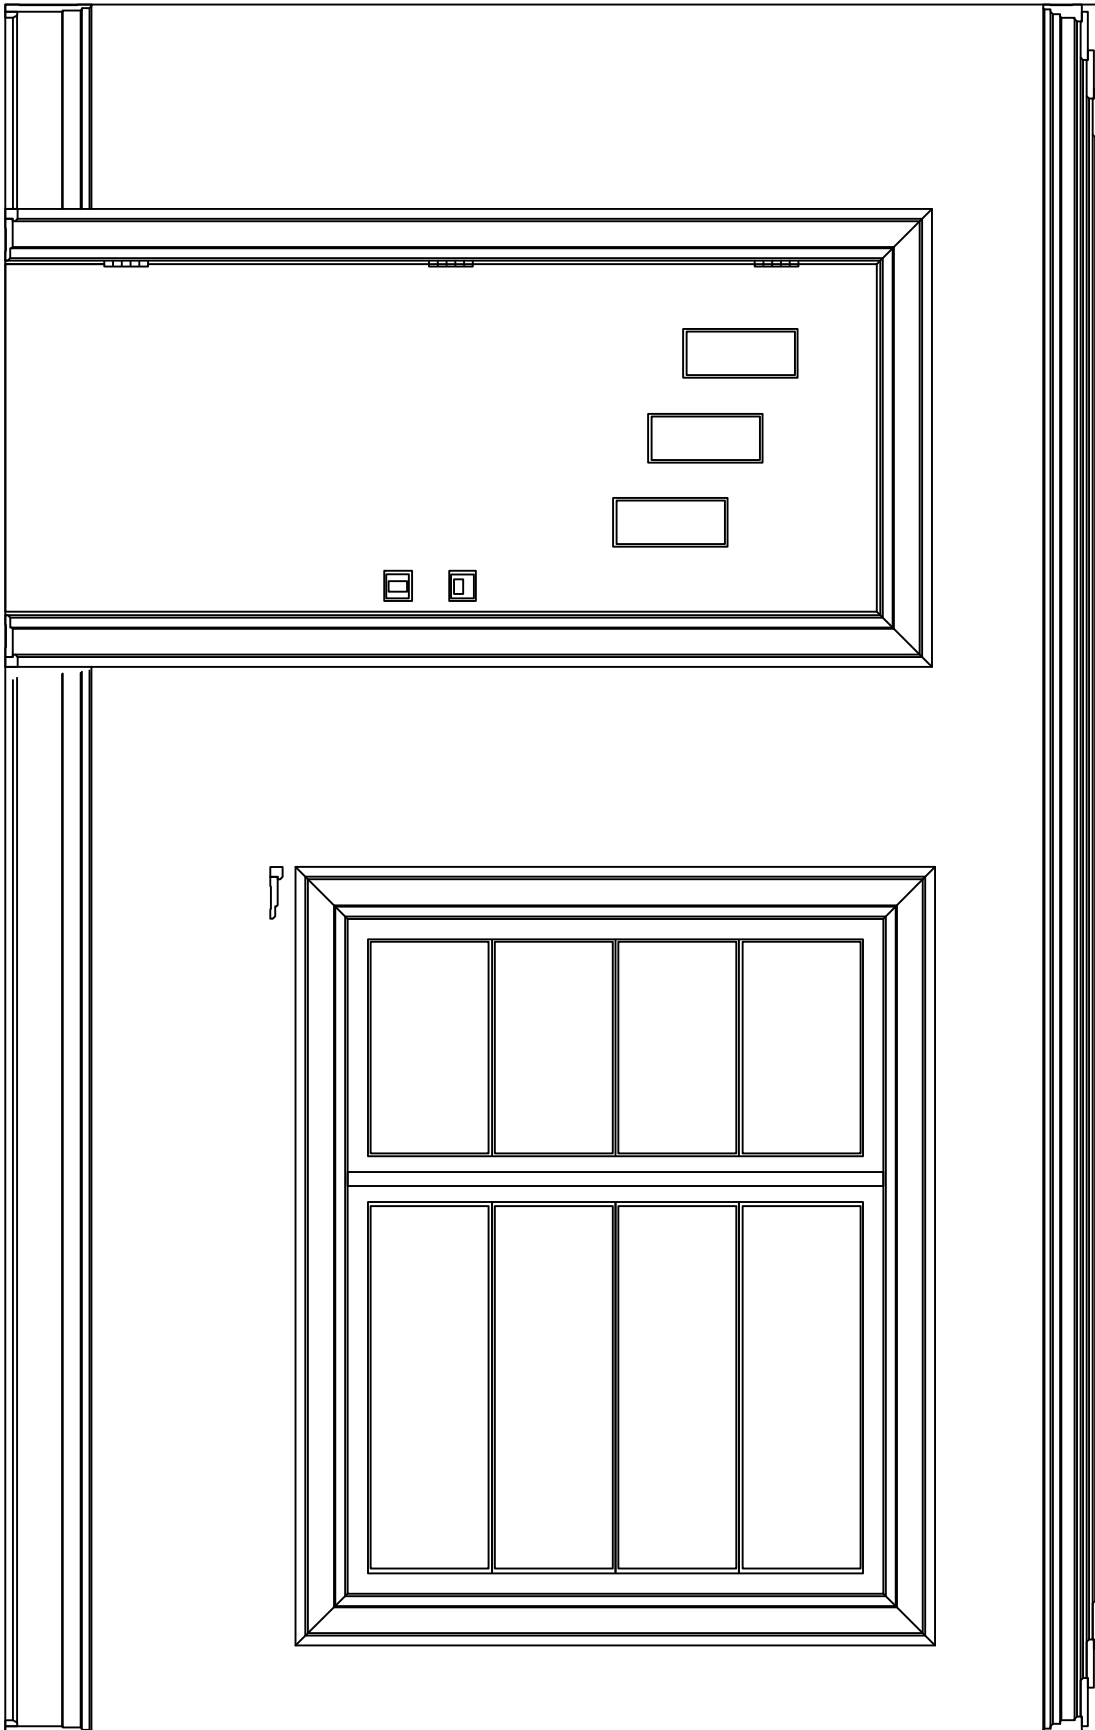

At Chicone Cabinetmakers we are dedicated to maintaining an American tradition in fine woodworking. Moldings can add a splash of charm to a room, transform an existing façade, restore original beauty, or fulfill unrealized potential. A small improvement can go a long way in adding character to your home. We can work within a full genre of architectural styles, recreating original moldings or updating a staid interior with a unique contemporary design. Our work down to the smallest detail, reflects our respect for the living and natural beauty of wood. Our moldings combine precision and quality together with the natural warmth of the finest hardwoods, to give you a product that will meet your needs and exceed your expectations.

We at Chicone Cabinetmakers are committed to maintaining the highest level of quality in all our products. Natural hardwoods are a living medium and certain inconsistencies and variations are inherent in the wood itself. We believe that these natural variations contribute to the character and beauty of natural hardwood moldings. These may include, but are not limited to, color variations from sapwood and heartwoods, knots, and worm holes. Cosmetic variations, however, will not affect the structural integrity of the moldings.

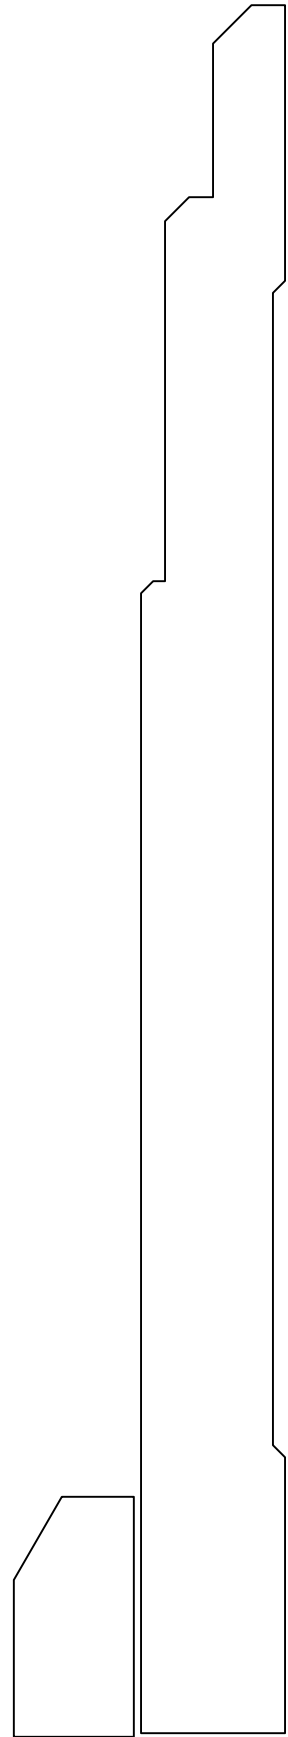

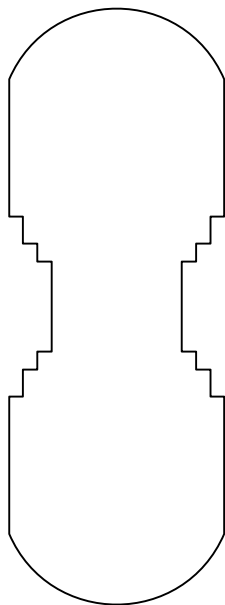

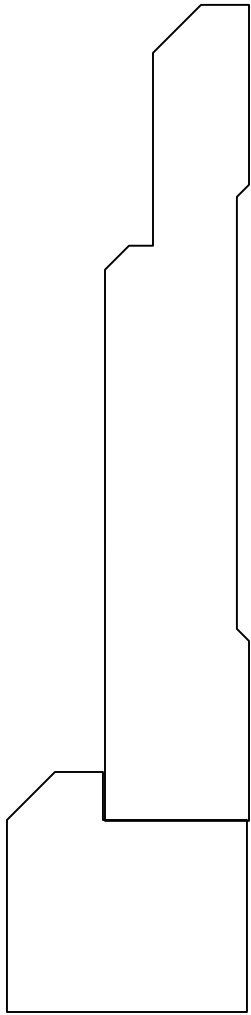

Our machining process may reveal additional characteristics of the wood such as minor bows, twists, and crooks. These natural variations will not affect product quality or workability. Molding will exhibit some machining marks but we strive to eliminate all chatter marks. When the moldings are 3-1/2" or wider, there may be at least one glue joint running the length of the piece.

We offer our moldings by the lineal foot and will mill according to your length specifications as availability of material allows. Contact us today and let us help you with your next molding project.
